RELEVANT PROJECTS

Habit Tracker Web App [GitHub](#) | [Web Link](#)

- It is a frontend web application that helps in **tracking a habit** for the last 6 days and maintain its records
- Implementing features like tracking whether Done/Not done/ No action for each day for the last 6 days.
- Made it **responsive** to all widths of screen and has capability of storing data for user using browser local storage.

Built using **ReactJS, Redux, HTML, CSS, JS** and deployed to GitHub Pages

To Do List [GitHub](#) | [Web Link](#)

- A Web Application that helps in **maintaining the to-dos** and track their state of completion with the help of dummy API.
- I have implemented features like **creating, deleting** to-dos and **marking** to-do as completed. It also has a feature of removing all ticked to-dos.

Built using **ReactJS, HTML, CSS, JS** and deployed to GitHub Pages

Stop watch [GitHub](#) | [Web Link](#)

- A static web Application that helps in performing actions of stopwatch like **lapsing, stopping, pausing** time.
- I have implemented this application with Light and Dark Mode

Built using **HTML, CSS, JS** and deployed to GitHub Pages

WORK EXPERIENCE

09/2021 - present **TATA TECHNOLOGIES LTD.**

Design Engineer

- I manage and lead **design release activities** for **X451** Platform Vehicle for Tata Motors PVB
- I release design data's using **Siemens TCUA** - PLM tool and Catia V5 following the customer quality standards
- Communicate with the supplier and co-ordinate activities as per project timeline.
- Perform simulations for vibration analysis using **Simsolid** tool
